

MATH 349

Introduction to Real Analysis –METU Mathematics Department

Titles of Videos:

- 1) Math 349-2020.10.13.1: Least Upper Bound Property of Reals-1
- 2) Math 349-2020.10.13.2: Least Upper Bound Property of Reals-2
- 3) Math 349-2020.10.15.1: Greatest Integer Function
- 4) Math 349-2020.10.15.2: Density of Rationals in Reals
- 5) Math 349-2020.10.20.1: Sequences of Real Numbers-1
- 6) Math 349-2020.10.20.2: Sequences of Real Numbers-2
- 7) Math 349-2020.10.22.1: Sequences of Real Numbers-3
- 8) Math 349-2020.10.22.2: Accumulation Points-1
- 9) Math 349-2020.10.27.1: Accumulation Points-2
- 10) Math 349-2020.10.27.2: The Reals are Complete
- 11) Math 349-2020.11.03.1: Open and Closed Subsets of the Reals
- 12) Math 349-2020.11.03.2: Cantor Intersection Theorem
- 13) Math 349-2020.11.05.1: Limsup and Liminf of a Sequence
- 14) Math 349-2020.11.05.2: Metric Spaces: Definition and Some Examples
- 15) Math 349-2020.11.10.1: Equivalence of Metrics
- 16) Math 349-2020.11.12.1: Uniform Metric, Open and Closed Balls
- 17) Math 349-2020.11.12.2: Open and Closed Sets in Metric Spaces
- 18) Math 349-2020.11.17.1: Interior, Exterior and Boundary of a Subset-1
- 19) Math 349-2020.11.17.2: Interior, Exterior and Boundary of a Subset-2
- 20) Math 349-2020.11.19.1: Closure of a Subset
- 21) Math 349-2020.11.19.2: Sequences in Metric Spaces
- 22) Math 349-2020.11.24.1: Characterization of Closure via Sequences
- 23) Math 349-2020.11.26.1: Completeness of Some Metric Spaces of Functions
- 24) Math 349-2020.12.01.1: Continuity of Functions
- 25) Math 349-2020.12.01.2: Uniform Continuity of Functions
- 26) Math 349-2020.12.03.1: More Examples of Uniformly Continuous Functions
- 27) Math 349-2020.12.03.2: Extensions of Uniformly Continuous Functions-1
- 28) Math 349-2020.12.08.1: Extensions of Uniformly Continuous Functions-2
- 29) Math 349-2020.12.08.2: Hölder's and Minkowski's Inequalities
- 30) Math 349-2020.12.10.1: Completion of a Metric Space-1
- 31) Math 349-2020.12.10.2: Completion of a Metric Space-2
- 32) Math 349-2020.12.15.1: Definition and Some Examples of Compact Metric Spaces
- 33) Math 349-2020.12.15.2: First Properties of Compact Metric Spaces
- 34) Math 349-2020.12.17.1: Sequential Compactness of Metric Spaces-1
- 35) Math 349-2020.12.17.2: Sequential Compactness of Metric Spaces-2
- 36) Math 349-2020.12.22.1: Compactness and Continuity-1
- 37) Math 349-2020.12.22.2: Compactness and Continuity-2
- 38) Math 349-2020.12.24.1: Lebesgue Number and Uniform Continuity
- 39) Math 349-2020.12.24.2: Riemann Integrability of Sequence of Functions and Weierstrass M-test

- 40) Math 349-2020.12.29.1: Definition and First Examples of Connected Subsets
- 41) Math 349-2020.12.29.2: Basic Properties of Connected Sets, Intermediate Value Theorem
- 42) Math 349-2020.12.31.1: Arcwise Connected Subsets
- 43) Math 349-2020.12.31.2: Connected Components of a Metric Space
- 44) Math 349-2021.01.05.1: Open Connected Subsets of the Euclidean Space are Path Connected
- 45) Math 349-2021.01.05.2.a: Topologist Sine Curve, Banach Contraction Mapping Theorem-1
- 46) Math 349-2021.01.05.2.b: Banach Contraction Mapping Theorem-2
- 47) Math 349-2021.01.07.1: Banach Contraction Mapping Theorem-3, Existence Uniqueness Theorem for I.V.P.'s.-1
- 48) Math 349-2021.01.07.2: Existence Uniqueness Theorem for I.V.P.'s.-2
- 49) Math 349-2021.01.12.1: Baire Category Theorem
- 50) Math 349-2021.01.12.2: Arzela-Ascoli Theorem-1
- 51) Math 349-2021.01.14.1: Arzela-Ascoli Theorem-2
- 52) Math 349-2021.01.14.2: Differentiation and Uniform Continuity
