

MATH 358

Partial Differential Equations –METU Mathematics Department

Fall 2023

Titles of Videos:

- 1) Math 358-1: Review of ODE's-1
- 2) Math 358-2: Review of ODE's-2
- 3) Math 358-3: System of Surfaces and Integral Curves-1
- 4) Math 358-4: System of Surfaces and Integral Curves-2
- 5) Math 358-5: Methods for Finding Integral Curves-1
- 6) Math 358-6: Methods for Finding Integral Curves-2
- 7) Math 358-7: General Theory of First Order PDE's-1
- 8) Math 358-8: General Theory of First Order PDE's-2
- 9) Math 358-9: General Theory of First Order PDE's-3
- 10) Math 358-10: General Theory of First Order PDE's-4
- 11) Math 358-11: Classification of First Order of First Order PDE's, Cauchy Problem for Linear PDE's-1
- 12) Math 358-12: Cauchy Problem for Linear PDE's-2
- 13) Math 358-13: Cauchy Problem for Quasi Linear PDE's
- 14) Math 358-14: Cauchy Problem for Non Linear PDE's-1
- 15) Math 358-15: Cauchy Problem for Non Linear PDE's-2
- 16) Math 358-16: Cauchy Problem for Non Linear PDE's-3, Compatible Systems and Charpit's Method-1
- 17) Math 358-17: Compatible Systems and Charpit's Method-2
- 18) Math 358-18: Some Special Type of First Order Non Linear Equations-1
- 19) Math 358-19: Some Special Type of First Order Non Linear Equations-2
- 20) Math 358-20: Jacobi's Method for First Order Non Linear Equations
- 21) Math 358-21: Classification of Second Order Linear Equations-1
- 22) Math 358-22: Classification of Second Order Linear Equations-2
- 23) Math 358-23: Classification of Second Order Linear Equations-3
- 24) Math 358-24: Wellposedness of Boundary and Initial Value Problems
- 25) Math 358-25: Factorization of Operators, Fourier Series-1
- 26) Math 358-26: Fourier Series-2
- 27) Math 358-27: Fourier Series, Convergence Theorems-3
- 28) Math 358-28: Fourier Series, Even and Odd Extensions-4
- 29) Math 358-29: An Example of Even and Odd Extensions, Derivation of Heat Equation
- 30) Math 358-30: Types of Boundary Conditions, Maximum Principle for the Heat Equation-1
- 31) Math 358-31: Maximum Principle for the Heat Equation-2
- 32) Math 358-32: Uniqueness and Continuous Dependence on BC's and IC.
- 33) Math 358-33: Separation Variables for the Heat Equation
- 34) Math 358-34: Non-homogeneous Constant Boundary Conditions
- 35) Math 358-35: Non-homogeneous Boundary Conditions
- 36) Math 358-36: Duhamel's Principle
- 37) Math 358-37: Another Example on Duhamel's Principle

- 38) Math 358-38: Wave Equation, Derivation and Uniqueness
- 39) Math 358-39: D'Alembert Solution for the Wave Equation on the Real Line
- 40) Math 358-40: D'Alembert Solution on the Semi-Infinite Line
- 41) Math 358-41: D'Alembert Solution on the Semi-Infinite Line, An example, Wave Equation of Finite String-1
- 42) Math 358-42: Wave Equation of Finite String-2
- 43) Math 358-43: Non-homogeneous Wave Equation, Duhamel's Principle
- 44) Math 358-44: Laplace Equation, Maximum/Minimum Principle
- 45) Math 358-45: Uniqueness Results for Laplace Equations
- 46) Math 358-46: Green's Identity and Fundamental Solution
- 47) Math 358-47: Sine and Cosine Series for Odd Multiples of Half Angles-1
- 48) Math 358-48: Sine and Cosine Series for Odd Multiples of Half Angles-2
- 49) Math 358-49: Poisson Integral Formula-1
- 50) Math 358-50: Poisson Integral Formula-2
- 51) Math 358-51: Example of Dirichlet BVP for Laplace Equation on a half Annulus
- 52) Math 358-52: Example of Dirichlet BVP for Laplace Equation on a Rectangle
- 53) Math 358-53: Mixed Dirichlet BVP for Laplace Equation on a Rectangle
- 54) Math 358-54: Fourier Transform, Definition and Properties
